South Tangerang

My name is Vinsensius Sugito Lein, commonly known as Vinsen. I am 26 years old and graduated with a Bachelor's degree in Information Systems from Bunda Mulia University with a GPA of 3.24, majoring in Application Development. I have experience in developing and maintaining desktop applications using .NET (VB.NET and C#), as well as developing web applications and backend Web APIs to support system integration and data communication. I am familiar with handling business modules, managing databases, and supporting reporting needs. I am adaptable, able to work both independently and in a team, and always eager to learn new technologies. I am highly interested in system development and continuously improving my skills to grow my career in system development.

Work Experiences

PT Realta Chakradarma - Gambir, Central Jakarta

Feb 2023 - Present

System development

- Maintained and developed Windows Forms–based smart client applications using VB.NET, C#, ASP.NET with the Realta Library Framework, contributing to systems like Rhapsody Hotel, Rhapsody Golf, SIAPP HRIS, and Bimasakti Tenant, handling core modules (master data, inquiry, batch processing, transactions, reporting), performing bug fixes, and implementing change requests based on Business Analyst requirements.
- Developed and maintained backend Web APIs to support web and mobile applications.
- Installed, configured, developed, and deployed the Rhapsody Golf Web.
- Managing databases using MySQL.
- Processed API data into Power BI and Excel Pivot for internal reporting and analysis purposes.

Bachelor of Information System, 3.24/3.00

SMK Pustek Serpong

Jul 2015 - May 2018

Computer and Network Engineering

Skills, Achievements & Other Experience

- **Project** (2025): School Management System API Tech Stack: C#, MySQL, and ASP.NET Core (.NET 8) with Entity Framework. The project uses a microservices structure (like StudentAPI, AuthAPI, AttendanceAPI) to manage main features such as student data and attendance. All services are connected through an API Gateway.
- **Projects** (2022): Skripsi – Marketplace Website for UMKM Beauty Salon (South Tangerang) Tech Stack: HTML, CSS, JavaScript, PHP, MySQL. Developed a web-based marketplace to support local beauty salon businesses in South Tangerang. Designed features for product listings, service information, and transaction management. Built and managed the MySQL database for storing user, product, and transaction data. Helped improve online promotion and business processes for UMKM through a digital platform.
- **Projects** (2021): Company Profile Website for Health Clinic Tech Stack: HTML, CSS, Bootstrap, Python. Developed a company profile website for a health clinic. Implemented CRUD functionality for managing clinic data and content.
- **Projects** (2021): Company Profile Website for Law Firm Tech Stack: HTML, CSS, JavaScript, Bootstrap, Python. Implemented backend CRUD functionality using Python for content and data management. Ensured structured and organized data handling for website updates.
